LOCAL NEWS.

THREE MENTIONS.

The following is a list of unclaimed letters remaining in the Anderson Post Office, June 26: Mary Gardlock, Vinnie Jones, Vinnie Jackson, Martha P. Keene, Geo. P. Pettigrew, J. O. Robinson, Rosa Romero, Emma Reese, Lizzie Silston, Charlie Strubbs, Minerva White, Mollie Weston.

A self action sofa, just large enough for two, has been invented. If properly wound up it will begin to turn a waltz in less than five minutes. At 10 it splits apart, and while one half carries the daughter of the house up stairs the other half carries her young man out of doors. They will come high, but people must have them. A number of them could be sold in Anderson.

Base ball may now be considered as having reached the height of its popularity. A young woman in Pennsylvania recently declined to let the result of a game of baseball determine whether she should accept or refuse a proposal of marriage. The young woman is in a dilemma. Seven innings only were played, and as nine innings make a game the young woman withheld her decision.

Messrs. Jas. H. and W. D. Bewley, with the former's family, left Anderson on last Monday morning for Laurens, where they will in future reside. The Messrs. Bewley will immediately open business there, dealing in stoves, tinware, bugles and wagons. We wish them success in their adopted home, and commend them to the people of Laurens as being worthy of confidence in every respect.

Mr. and Mrs. John B. Moore have the sympathy of their many friends in this city in the death of their little son, Frederick, which occurred on last Tuesday morning at 7 o'clock, after an illness of about three months, from typhoid fever. Frederick was eight years old, and a bright, interesting little boy. His remains were interred on Wednesday morning in the Presbyterian Cemetery, Rev. D. E. Frieson, D. D., conducting the funeral services.

The wild woman has at last reached this section, so the darkeys say. She is described as being about seven or eight feet in height, with hair reaching to her feet, her finger nails five or six inches long, and her teeth protruding one or two inches from her mouth. An headless man is said to have been seen with her. She has been seen by several darkeys near the corporate limits of the General's road, in consequence of which they have quit traveling that road after dark.

Mrs. Mary C. Acker, consort of the late Capt. W. H. Acker, died at her residence in Yarmouth, Maryland, four miles south of this city, on Wednesday night, June 1st, after an illness of ten or twelve days, from typhoid fever. The deceased was about fifty-five years of age. She was a most estimable lady, a devoted and exemplary member of Flat Rock Baptist Church, and greatly beloved by all who knew her. The family of the deceased have the sympathy of a host of friends and relatives in their bereavement. Her remains were laid to rest in the Flat Rock Cemetery on the day following her death, appropriate funeral services being conducted by Rev. W. H. King.

We are informed that for several weeks past a number of applications have been filed by citizens in this city from friends in the low country, inquiring if private board can be secured here during the summer months. Of course, the replies were in the negative, for there are only two or three private boarding houses in the city, and they are crowded. Why are there not more boarding houses? It is because there is no money to be made in keeping boarders. We think not. Every summer there are numerous applications for private board in our midst, and the applications seem to increase each year. These applicants are willing to pay a reasonable price for board, and are anxious to come to Anderson. It is not a reflection on Anderson that we can't accommodate them. We trust that our people will take this subject into consideration, and see if accommodations cannot be had for all who apply. If there are not those in our city who are willing to take boarders, we know there are persons in other places who would gladly move here and open boarding houses. Let some enterprising citizen build two or three large dwelling houses. We venture he could secure a good deal of business.

If we had one or two hundred Summer boarders here every year, we would not only enrich them considerably, besides adding hundreds of dollars to our merchants' tills.

Besides the families immediately interested in the school, there were a considerable number of invited friends to witness the exercises, and to feast on the good things which were spread at the conclusion of Mr. Clinckale's excellent speech. Three handsome prizes were offered by the scholars, as a special inducement to the teacher to apply themselves in their studies.

The first prize was offered to the one who would succeed in securing the best general average during the term. The second was offered to the one who would keep the nearest set of copy books, and make the greatest progress in penmanship. The third prize was offered to the one who would keep the neatest and prettiest exercise book. The first prize was awarded to our little friend, Alice Dean, third daughter of Mr. T. Dean. The two last prizes were decided by a committee of three, consisting of Rev. R. C. Ligon, Dr. R. A. Reid and Mr. Jesse Milford. The copy and exercise books were referred to the committee, and after a long and careful examination, they decided unanimously that Miss Ida Beaty merited the prize offered for the copy books, and Miss Ella Dean for the neatest and prettiest exercise book. The committee had great difficulty in deciding which should be the recipients of these prizes, so neatly were the copy and exercise books kept, and so marked was the progress made by several in penmanship. This department of the school reflected very great honor upon the teacher, and showed conclusively that more than usual attention had been given to the matter of writing. Miss Graham is from Autaugaunville, Ala., and although this is her first year as a teacher in South Carolina, yet she has succeeded in establishing herself as one of the very best educators in this section of the State.

We congratulate the Greenville school for having such an accomplished teacher, and sincerely hope that they may succeed in securing her services for another year.

ONE OF THE COMMITTEE.

Look at This.

I will sell Harness, according to quality, cheaper than anywhere in the State for the next thirty days. The best of material used, and all work guaranteed.

THE BEST JAVA, RIO and Laguarda Coffee, fresh roasted at "City Grocery" every week.

The Cotton Seed Oil Mill.

As it is generally known through this section that Mr. J. H. Townsend has purchased a cotton seed oil mill, and knowing that a great deal of interest is being manifested in this comparatively new industry, the INTELLIGENCER reporter visited this gentleman's establishment on last Monday morning, with a view of giving our readers, in a brief way, some idea how cotton seed oil is made.

Mr. Townsend's mill is situated on East Boundary street, between Depot and Benson streets. For two years past he has been operating a gin and corn mill here. These did not occupy his time fully, especially during the Summer season, and being naturally a live, progressive and energetic man, he concluded to purchase a cotton seed oil mill, believing that the establishing of one here would be of great benefit to our people, as well as a profitable business for himself.

After visiting Charleston and inspecting the work in the oil mill in that city, he at once commenced making additions to his buildings, at the same time giving his order to Messrs. Sullivan & Bro., agents in this city for Messrs. J. W. Caldwell & Co., of Richmond, Va., the leading manufacturers of oil mills in the South.

For two or three weeks past Mr. J. H. Townsend, the gentlemanly and urbane representative of Messrs. Caldwell & Co., has been engaged in putting up the machinery for Mr. Townsend. The first run of oil was made on last Friday, and the machinery works admirably.

When we visited the mill on Monday we were disappointed in not seeing it in operation. Mr. Synnor, however, very courteously showed us through the mill, and explained everything in a satisfactory manner.

The cotton seed is first placed into a hopper, from which they fall into what is called the Seed Screen, where they go through a cleansing process and are carried on an elevator, a distance of twenty feet, where they are emptied into a Blower. Here the seed is separated from everything foreign, such as nails, gravel, &c., and carried into the Huller, where the hulls are separated from the seed. The meat (as the substance of the seed is now called) is carried from the Huller, through another elevator, to the Rollers, where they are crushed. From the time the seed are first placed into the Seed Screen, they are not touched by hand until they have passed through the rollers. From the Rollers the meat is taken up and measured, and a certain quantity at a time placed into the Steamers, where they are steamed for about twenty minutes. On being taken out of the Steamers, the meat is placed into combs, which hair bags—each bag holding about nine pounds—and placed into what is called Books, which are made of hydraulic pressed paper. These Books are then placed into Boxes, which are put into a hydraulic press of four hundred ton pressure. The press holds five Boxes, and consequently presses forty-five pounds of meat at a time. In about ten minutes all the oil is pressed out and conveyed in five days, where it remains four or five days, after which it is pumped into barrels and ready for market. After the oil is pressed out the cake is removed to a mill and ground into meal.

The process of making oil consumes about thirty-five minutes from the time the seed are first placed into the Screen. The seed yields, according to the season when the oil is made, from twenty-five to thirty-five gallons per ton. Mr. Townsend's mill has a capacity of two tons of seed per day, though he can double this at any time by the addition of another press and another steamer, the other machinery being adequate for that amount.

As a fertilizer and cow food, the cotton seed meal is very valuable. Indeed, the meal is said to be a better fertilizer after the oil is pressed out than before. The oil, too, in its crude state, finds a ready market, and the demand is daily increasing. At five cents per gallon, though the price fluctuates considerably.

This is an enterprise that will be of untold benefit to our whole County, and Mr. Townsend is the man to make it a success.

THE DEANVILLE SCHOOL.

Mr. Editor: June the 15th was the closing day of Miss Maggie Graham's school at Deanville.

The exercises consisted simply in the awarding of three special prizes to the successful pupils, and a speech by Mr. Baxter, Clinckale, subject "Education." The Rev. R. C. Ligon by request presided, awarded the prizes and introduced the speaker.

Besides the families immediately interested in the school, there were a considerable number of invited friends to witness the exercises, and to feast on the good things which were spread at the conclusion of Mr. Clinckale's excellent speech. Three handsome prizes were offered by the scholars, as a special inducement to the teacher to apply themselves in their studies.

The first prize was offered to the one who would succeed in securing the best general average during the term. The second was offered to the one who would keep the nearest set of copy books, and make the greatest progress in penmanship. The third prize was offered to the one who would keep the neatest and prettiest exercise book. The first prize was awarded to our little friend, Alice Dean, third daughter of Mr. T. Dean. The two last prizes were decided by a committee of three, consisting of Rev. R. C. Ligon, Dr. R. A. Reid and Mr. Jesse Milford. The copy and exercise books were referred to the committee, and after a long and careful examination, they decided unanimously that Miss Ida Beaty merited the prize offered for the copy books, and Miss Ella Dean for the neatest and prettiest exercise book. JOHN E. PEOPLES,

AGENT FOR THE CELEBRATED

VAN WINKLE GIN, FEEDER,

AND

CONDENSER!

Manufactured at Atlanta, Georgia, and to which the PREMIUM was awarded at the Atlanta Cotton Exposition, Charleston Industrial Exhibition, Feb. 2, 1882, and at the South Carolina and Georgia State Fairs 1881.

CERTIFICATE:

E. VAN WINKLE & CO.—Awarded for Best Sample, best general results in Ginning, and best constructed Machine, the first prize, \$100.00, or Gold Medal.

J. W. RICHES, Mississippi.

T. W. SMEDERS, Mississippi.

W. E. BARROWS, Connecticut.

H. I. KIMBALL, Director General Atlanta Cotton Exposition.

Description of our Gin.

THE VAN WINKLE GIN is made with substantial iron frame, self-rolling boxes, brush boxes self-adjusting. Every precaution taken to prevent girt getting in the journals. The brushes are made with iron bound heads, and the sticks dove-tailed in and driven in from the end, and any one of them can be taken out or replaced without interfering with the other sticks. No use of wire nor glue, and it is impossible for the sticks to fly off. The ribs are made of best chilled iron and most improved pattern, the saws of best English steel and need no point. Every part of the gin has been gotten up with great care, with the special idea of making a machine that will not get out of order, easily repaired if it should, always ready for work, and give the best general results. Any piece can be duplicated from our factory.

The Van Winkle Feeder and Condenser

Can be attached to any other Gin, so parties having other make of Gins and wishing Feeders or Condensers can be supplied by sending in their order in time, and I will guarantee satisfaction.

ALL KINDS PULLEYS AND SHAFING, MOST IMPROVED CANE MILLS & EVAPORATORS FURNISHED TO ORDER.

Van Winkle's King Cotton Press

Has long been before the public, and is too well known to need any further description. Its chief points of merit are: It takes very little room, is easily handled, and takes so little power; can be used on all kinds of powers—horse, water or steam. Ginning and packing can all go on at the same time, without interfering with the Gin. A two-horse belt will pack a 500 lb. bale of cotton. It saves its cost the first season in labor.

Read the following Testimonials:

ANDERSON, S. C.—Mr. John E. Peoples—Sir: The Steam Power Van Winkle Cotton Press bought from you last Fall has given entire satisfaction. I packed bales of cotton weighing 600 to 725 lbs. in five minutes with all ease, using a 4-inch belt and 25 lbs. steam. There did not seem any more strain on the Press than with a 450 lb. bale. For strength, durability, lightness of power, small quantity of steam required, economy of space, I deem it the King of all Cotton Presses; especially so as the low price at which it can be bought for puts it within reach of every man running a gin. In fact, I would not be without it for twice its cost. I would advise all my friends to buy one of Van Winkle's Steam Power Cotton Presses, as you will save its cost in labor in one year.

M. A. COBB.

ANDERSON, S. C.—John E. Peoples—Dear Sir: The Van Winkle Steam Power Press we bought of you last Fall is the very Press adapted to the wants of the farmers of this County. It saves labor, takes but very little room, and very little power to run it up and down. We only work one hand with our Press. Can cheerfully recommend it to any one wishing to purchase a Press, as it will save its cost in a short time. We packed bales weighing over 600 lbs. with a 4-inch belt.

S. CARPENTER.

Below find the names of parties who are using the Van Winkle Press, who will testify to its merits:

W. M. Martin, J. C. & C. J. Milford, J. E. & F. R. McClure, Shirley & Co., Reuben Clinckale, Thomas C. Jackson, Fred G. Brown, W. H. G. & Co., D. H. Hammond, H. Rush, J. G. & W. Wilson, G. G. Richards, Bolt & Milford, J. Jolly Poble, Keasler & Lindsay, M. A. Mahaffey, Mr. Simpson, Piedmont, S. C.

J. C. & C. J. Milford, J. E. & F. R. McClure, Broyles, Howell & Co., James N. Richy, J. Willet Provost, J. G. & Co., W. Q. Hammond, Sligh & Woodin, Joseph Watkins, John McAlister, E. W. & J. M. Ashley, Garrett & Opt, C. P. Davis, S. J. Duckworth, J. L. Erskine, James Erskine, J. C. & W. P. Shirley, K. B. Smith, Drake & McConnell, W. J. Ervin, the best of the best improved steel, The saw shaft is the largest made. An examination of other Gins will convince you it is the most substantially built Gin in use. It saves labor, and therefore does away with the expense of the revolving head, as the rest of making the Gin to suit the breaking the roll in the proper shape of the roll-box. Below I give you a few names of those who have purchased the Hall Gin:

Lewis C. Clinckale, A. J. Stringer, J. W. Potts, W. M. Shirley, S. R. Timms, John R. Kelly, Basil Callahan, Welborn & W. M. Martin, C. S. & J. Milford, J. E. & F. R. McClure, Morris & Co., Reuben Clinckale, Johnson & Dacus, W. A. Neal, J. E. & F. R. McClure, J. L. Haddon, Garrett & Opt, R. A. Drake, E. W. Long.

E. Van Winkle & Co. make a SINGLE SCREW PRESS that will pack a bale of cotton in two minutes.

Send for prices and catalogue.

JOHN E. PEOPLES.
